BUSINESS OVERVIEW

PLAIN ENGLISH

- Lucid designs and builds luxury electric cars: the Air, a high-end sedan, and the Gravity, a three-row SUV. It engineers its own electric motors, batteries and charging technology in-house, and those parts are unusually efficient, which is how Lucid wins on driving range.
- It sells cars directly to affluent buyers and also licenses its powertrain technology to other automakers such as Aston Martin.
- Saudi Arabia's sovereign wealth fund owns the majority of the company and keeps funding it.

THE TECHNICAL VERSION

- Lucid is a vertically integrated premium EV OEM built around a 900V+ electrical architecture, in-house drive units (motor, inverter, transmission), the Wunderbox onboard charger and proprietary battery pack engineering, which together deliver best-in-class efficiency (miles per kWh) and range.
- Revenue is overwhelmingly vehicle sales (Air, Gravity), supplemented by a technology-licensing and component-supply line (the Aston Martin agreement, >$450M including a $232M access fee).
- Production runs at AMP-1 (Casa Grande, Arizona) and AMP-2 (King Abdullah Economic City, Saudi Arabia), the latter scaling from CKD reassembly toward full build, ~155k-unit capacity.
- A sub-$50k Midsize platform is targeted for ~late 2027 to broaden the addressable market, and an expanded Uber/Nuro deal commits Lucid to supply 35,000+ Level 4 robotaxi vehicles.

EXPLAINED SIMPLY

- Think of Lucid as the company trying to be the luxury-tech leader of electric cars.
- Where Tesla chases scale, Lucid chases the best engineering: the longest range and the most efficient motors.
- The catch is that building cars burns enormous cash, and Lucid is still losing far more than it earns, so it leans on a very wealthy backer, Saudi Arabia's investment fund, to keep the lights on while it scales the Gravity SUV and a cheaper future model.

- (NASDAQ: LCID) is a U.S.-based premium electric-vehicle manufacturer headquartered in Newark, California, building luxury EVs at its Casa Grande, Arizona plant (AMP-1) and a second facility in King Abdullah Economic City, Saudi Arabia (AMP-2). Its lineup is the Lucid Air luxury sedan and the three-row Lucid Gravity SUV, which began deliveries in late 2025.
- Saudi Arabia's Public Investment Fund (PIF) is the controlling shareholder (roughly 55-63%) and primary capital backer.
- Beyond vehicles, Lucid monetizes its in-house powertrain and battery technology through licensing and supply deals, most notably with Aston Martin.

How the business works, left to right: who buys, what the platform provides, and the payoff.

HOW LUCID GROUP IS DIFFERENT

PLAYER	WHAT THEY MAKE	HOW LUCID GROUP DIFFERS
Tesla (TSLA)	Mass-market and premium EVs at enormous scale, profitably	Lucid plays only at the luxury top end and out-engineers on range and efficiency, but it is a fraction of Tesla's size and burns cash where Tesla generates it.
Rivian (RIVN)	Premium electric trucks, SUVs and delivery vans	Closest US EV-startup peer by stage and cash burn; Lucid skews to sedans/luxury and monetizes powertrain licensing, while Rivian leans on its Amazon van franchise and a VW software JV.
Legacy luxury (Mercedes, Porsche, BMW)	Electric versions of established luxury franchises	They bring brand, dealer networks and profits from gas cars; Lucid is EV-native with superior efficiency but no legacy cash flow to fund the build-out.
Chinese EV makers (NIO, XPeng, Li Auto)	Fast-growing, lower-priced premium EVs for China	They grow far faster on volume and are largely walled out of the US; Lucid competes on ultra-premium positioning and technology rather than price or unit volume.

EXECUTIVE LEADERSHIP

CHIEF EXECUTIVE OFFICER SINCE 2026

Silvio Napoli

Named April 2026, effective June 1, 2026; ~31-year Schindler Group veteran (an industrial-operations outsider to autos), brought in to drive cost discipline and the production ramp.

CHIEF OPERATING OFFICER SINCE 2025

Marc Winterhoff

Former Interim CEO (Feb 2025 to mid-2026) following Peter Rawlinson's departure; reverted to COO on Napoli's appointment.

CHIEF FINANCIAL OFFICER SINCE 2025

Taoufiq Boussaid

Joined as CFO effective February 25, 2025; leads the balance-sheet and operating-leverage agenda amid heavy cash burn.

SVP, DESIGN & BRAND SINCE 2015

Derek Jenkins

Leads vehicle design and brand across the Air, Gravity and the upcoming Midsize platform.

PRODUCT & REVENUE MODEL

- Lucid earns the bulk of revenue from direct retail sales of its premium EVs, the Air sedan and the higher-volume Gravity SUV. A second stream is technology licensing and component supply: Lucid sells its proprietary electric powertrain, twin-motor drive units, battery systems and Wunderbox charging technology to other automakers, most notably a 2023 agreement with Aston Martin worth more than $450 million (including a $232 million technology-access fee). Manufacturing spans Casa Grande, Arizona and the Saudi AMP-2 plant, which is scaling from kit reassembly toward full build with capacity targeted around 155,000 vehicles per year.
- A lower-priced ~$50,000 Midsize platform is targeted for production around late 2027 to broaden the market beyond ultra-luxury, and an expanded Uber/Nuro partnership commits Lucid to supply at least 35,000 robotaxi-ready vehicles.

FINANCIALS & KEY METRICS

Q1 2026 · 2026-05-05

REVENUE	REV GROWTH	VEHICLES DELIVERED	VEHICLES PRODUCED
$282.5M	20% YoY	3,093	5,500 +149%

NET LOSS	LIQUIDITY
$1.03B EPS $(3.46	$3.2B ~$4.7B pro forma

- **AI / Product:** Lucid is pursuing new revenue streams through autonomy, robotaxi and software-enabled innovation, with the upcoming Midsize platform positioned to enable autonomous mobility at scale through cost efficiency and a technology-forward user experience. On margins, GAAP gross margin was deeply negative (~-110%), which management and coverage attributed to lower delivery volume against a largely fixed manufacturing cost base, under-absorption of fixed costs and the non-repeat of large Q4 regulatory-credit revenue.

- **Demand:** Management attributed the delivery shortfall to a ~29-day supplier-driven halt on Gravity shipments (a second-row seat quality issue), since resolved, rather than soft demand. Production rose 149% YoY as the Gravity ramp continued, and the company expanded its Uber robotaxi commitment to at least 35,000 vehicles, signaling confidence in the ramp even as it pulled formal full-year guidance.

KEY RISKS & DEBATES

- ! **PIF dependence:** Saudi PIF owns the majority of Lucid and is the lender/buyer of last resort; the equity is effectively a minority stake riding on continued sovereign funding and governance control
- ! **Cash burn & dilution:** deeply negative gross margin (~-110% GAAP in Q1) and a $1B+ quarterly net loss force repeated capital raises and term-loan draws, diluting holders (a 1-for-10 reverse split was executed in 2025)
- ! **Guidance suspended:** management pulled formal 2026 production guidance pending the new CEO's review, reducing near-term visibility on the Gravity ramp

- ! **Volume scale:** at ~3,000 deliveries per quarter, Lucid is sub-scale versus the fixed cost of two plants; the path to positive gross margin depends entirely on a steep Gravity and Midsize ramp
- ! **Leadership transition:** a non-automotive outsider CEO (Napoli) takes over after 14 months of interim leadership and the loss of founder Peter Rawlinson, the company's technical visionary
- ! **Demand & competition:** EV demand has softened and luxury EV competition (Tesla, legacy marques) is intensifying, with execution risk around the unproven Uber/Nuro robotaxi channel

SLIDE-READY BULLETS

1. Lucid is the technology leader of the premium EV field, engineering its own 900V powertrain, drive units and batteries for class-leading range, and now licensing that technology to Aston Martin in a deal worth more than $450M
2. Q1 2026 revenue grew 20% YoY to $282.5M on 3,093 deliveries, but the company remains deeply unprofitable, posting a $1B+ net loss and roughly -110% GAAP gross margin as fixed plant costs dwarf still-sub-scale volume
3. Saudi Arabia's PIF owns the majority of Lucid and has repeatedly backstopped it (term-loan facility lifted to ~$2.0B), making continued sovereign funding the single most important variable in the equity story
4. New CEO Silvio Napoli (effective June 1, 2026), a 31-year Schindler operations veteran, takes over after Lucid suspended 2026 production guidance and launched a $500M cost-cut plan, signaling a discipline-and-ramp reset
5. The growth case rests on three legs: the Gravity SUV ramp, a sub-$50K Midsize platform around 2027, and an expanded Uber/Nuro robotaxi commitment of 35,000+ vehicles, each unproven at scale

SMART DILIGENCE QUESTIONS

Q1 PIF funding path: What are the explicit conditions, covenants and capacity remaining on PIF's ~$2.0B term-loan facility, and at what delivery run-rate does Lucid reach gross-margin breakeven without another raise?

Q2 Gravity ramp economics: What is the current weekly Gravity production rate post the 29-day seat-supplier disruption, and what unit volume and mix are required for the Gravity to carry positive contribution margin?

Q3 Robotaxi & licensing optionality: How firm are the 35,000-unit Uber/Nuro commitments (timing, pricing, take-or-pay), and what is the realistic revenue contribution from technology licensing beyond the Aston Martin agreement?
