BUSINESS OVERVIEW

- eGain Corporation (NASDAQ: EGAN) is a Sunnyvale, California enterprise SaaS company (fiscal year ending June 30) that sells an AI-powered knowledge-management platform for customer engagement and contact centers.
- Its flagship AI Knowledge Hub centralizes fragmented enterprise content and delivers trusted, governed, real-time answers to both AI agents and human contact-center reps across voice, chat, email, and self-service.
- Founder Ashu Roy has run the company since 1997 and is repositioning it around generative-AI knowledge, 'trusted knowledge infrastructure for AI', while deliberately sunsetting legacy messaging.
- In Q3 FY2026 (ended March 31, 2026) revenue was \$22.5M (+7% YoY) with AI Knowledge Hub ARR of \$48.0M (+26% YoY, 64% of total SaaS ARR), adjusted EBITDA margin of ~14%, \$80.5M cash, and zero debt.
- At a ~\$207M market cap and ~1.4x EV/Revenue, EGAN is a profitable, net-cash micro-cap whose central debate is whether the AI Knowledge mix shift can re-accelerate the whole company past its high-single-digit headline growth.

How the business works, left to right: who buys, what the platform provides, and the payoff.

EXECUTIVE LEADERSHIP

CHAIRMAN AND CHIEF EXECUTIVE OFFICER

Ashutosh (Ashu) Roy

Co-founder; has led eGain since 1997. Previously founded WhoWhere? Inc and Parsec Technologies. BS (IIT New Delhi), MS (Johns Hopkins), MBA (Stanford).

CHIEF FINANCIAL OFFICER

Eric Smit

Over 15 years of finance and operations experience; previously Director of Finance at WhoWhere? Inc.

SENIOR VICE PRESIDENT, PRODUCTS AND SERVICES

JC Rao

Joined eGain in 1999; progressed through product engineering, management, and customer success roles.

SENIOR VICE PRESIDENT, WORLDWIDE SALES AND CUSTOMER SUCCESS

Vishal Nehru

Two decades of leadership in strategic sales, customer success, and professional services.

PRODUCT & REVENUE MODEL

- The core product is the eGain AI Knowledge Hub, which connects disparate content sources (SharePoint, CRM knowledge bases, product docs, policies, intranets, legacy systems) and delivers consistent, accurate, governed answers across channels, powering customer-facing AI/virtual agents and agent-assist for human reps.
- It is powered by AssistGPT, a generative-AI capability for content creation, curation, and authoring, layered with content-lifecycle governance (create, review, approve, translate, retire; duplicate/conflict/broken-link checks). Recent launches extend the platform into the agentic layer: AI Agent IVA (conversational virtual agents), Agentic Studio (multi-agent orchestration via MCP/A2A), an AI Knowledge Suite for retail banking, and connectors that feed governed knowledge to Microsoft Copilot, Anthropic Claude, Google Gemini and Cursor, an 'arms-dealer' move positioning the Hub as a system of record for compliant content across the AI ecosystem.
- Revenue is ~92% recurring SaaS; AI Knowledge Hub ARR (\$48.0M, +26% YoY) is the growth engine and now 64% of total SaaS ARR.

RECENT NEWS

2026-05-14

eGain Reports Q3 FY2026: Revenue +7% to \$22.5M, GAAP Net Income \$2.4M, AI Knowledge Hub ARR +26%

SOURCE: [EGAIN \(SEC EDGAR 8-K\)](#)

Profitability inflected sharply (adj. EBITDA margin 14% vs 6% y/y; GAAP EPS \$0.09 vs ~\$0.00) as the AI Knowledge Hub, ARR up 26% to \$48.0M, now 64% of SaaS ARR, becomes the growth engine. Management flagged RFP activity roughly doubling, mostly U.S. Fortune 1000 banking, insurance and healthcare.

eGain Expands Stock Repurchase Program to \$60M Aggregate with FY2025 Results

SOURCE: EGAIN (SEC EDGAR 8-K)

Board lifted the buyback authorization from \$40M to \$60M after repurchasing ~\$39.8M, a capital-return signal underscoring management confidence as the AI transition plays out on a net-cash balance sheet.

FINANCIALS & KEY METRICS

Q3 FY2026 (ended March 31, 2026) · 2026-05-14

REVENUE \$22.5M +7% YoY (SaaS +7%; +11% ex-legacy messaging)	AI KNOWLEDGE HUB ARR \$48.0M +26% YoY	GAAP EPS \$0.09 diluted GAAP net income \$2.4M	NON GAAP EPS \$0.11 diluted non-GAAP net income \$3.2M
ADJ EBITDA \$3.2M ~14% margin	GROSS MARGIN GAAP 73% GAAP / 74% non-GAAP	CASH \$80.5M cash, zero debt	FY2026GUIDE Revenue \$90.5-91.0M; non-GAAP EPS \$0.39-0.42; adj. EBITDA \$11.9-12.4M

LAST 4 QUARTERS

	2Q25	3Q25	4Q25	1Q26
REVENUE	\$23M	\$24M	\$23M	\$22M
QOQ	+10.6%	+1.2%	-2.3%	-2.1%
GROSS MARGIN	72.7%	75.2%	73.1%	73.4%

SOURCE: yfinance / Yahoo Finance (quarterly income statement) · calendar-quarter labels on fiscal period-ends; gross margin = gross profit / revenue. Most recent quarter (1Q26): 7.1% YoY revenue growth.

- **AI / Product:** AI demand was the dominant theme. AI Knowledge Hub ARR grew 26% YoY to \$48.0M and now represents 64% of total SaaS ARR, and management said the mix will keep shifting toward it.
- **Demand:** Pipeline and RFP activity accelerated sharply: management said trailing-60-day RFP volume was roughly double its average rate, concentrated in U.S. Fortune 1000 BFSI (banking, insurance) and healthcare, attributed to growing awareness of the knowledge-quality problem in AI deployments. Offsetting the strength, the quarter absorbed a one-time ~\$1.6M total SaaS ARR reduction (incl. ~\$0.9M AI Knowledge) when an EMEA on-premise customer declined to migrate to eGain Cloud and terminated, tied to country-level cloud restrictions; excluding non-core legacy messaging, all-customer SaaS ARR would have grown 11% YoY versus the reported 7%. The company ended with \$80.5M cash, no debt, ~27% YTD operating-cash-flow margin, and ~\$20M remaining under its buyback authorization.

KEY RISKS & DEBATES

- ! **Headline growth still high-single-digit:** total revenue grew only 7% YoY in Q3 FY2026 and FY2026 revenue is guided to \$90.5-91M, roughly flat versus FY2024's \$93.1M. The bull case rests entirely on AI Knowledge Hub ARR (+26%) eventually dominating the mix enough to lift the whole company; until then, the consolidated growth rate looks pedestrian for an 'AI' name.
- ! **Customer concentration:** one customer that is also a channel partner accounted for ~16% of FY2025 revenue (18% in FY2024). Loss or renegotiation of that relationship would be a material revenue and ARR shock.

- ! **Legacy drag and lumpy ARR:** the deliberate sunset of ~\$4.7M legacy messaging ARR (to zero by FY2027) suppresses reported growth, and Q3 showed how a single EMEA customer termination can knock ~\$1.6M off SaaS ARR in a quarter, small absolute numbers swing a ~\$75M ARR base.
- ! Competitive intensity from scaled CX suites: NICE, Verint, Pegasystems, Salesforce Service Cloud, ServiceNow and Microsoft all embed knowledge/agent-assist into far larger platforms and can bundle it at near-zero incremental price, pressuring a point-solution vendor's pricing and attach.
- ! **Micro-cap liquidity and coverage:** ~\$207M market cap, only 3 covering analysts, ~230k average daily share volume and a 52-week range of \$5.45-\$15.95, the stock is thinly traded and volatile, and a founder-chairman-CEO controls the agenda.
- ! **AI commoditization risk:** if hyperscaler/foundation-model 'knowledge grounding' (RAG, native enterprise connectors) becomes good-enough out of the box, eGain's governed-knowledge differentiation could compress over time even as near-term demand rises.

IPO READINESS

- Public since 2000 (NASDAQ: EGAN). Net-cash balance sheet (\$80.5M cash, no debt); ~27% YTD operating-cash-flow margin.
- Capital returned via buyback (authorization expanded to \$60M aggregate in Sept 2025; ~\$20M remaining). 3 covering analysts, mean target \$12.83 (range \$8-\$20), a thinly covered, founder-led micro-cap.

SLIDE-READY BULLETS

- 1

AI Knowledge Hub is the engine: ARR \$48.0M, +26% YoY, now 64% of total SaaS ARR (Q3 FY2026), the mix shift, not headline 7% revenue growth, is the thesis. Management guides AI Knowledge ARR to double-digit growth into FY2027.
- 2

Profitable and net-cash, rare for an 'AI' micro-cap: Q3 adj. EBITDA \$3.2M (~14% margin, up from ~6%), GAAP net income \$2.4M, \$80.5M cash, zero debt, ~27% YTD OCF margin, and ~\$20M left on a \$60M buyback.
- 3

Demand inflecting: RFP volume roughly doubled in the trailing 60 days, concentrated in U.S. Fortune 1000 banking, insurance and healthcare, as enterprises confront the 'garbage in, garbage out' knowledge-quality problem grounding their AI agents.
- 4

Platform moving up-stack: new Agentic Studio (multi-agent orchestration via MCP/A2A), AI Agent IVA, a retail-banking suite, and governed-knowledge connectors into Copilot, Claude, Gemini and Cursor expand eGain from contact-center tool to enterprise AI grounding layer.

- 5 Cheap and overlooked, but for reasons: ~1.4x EV/Revenue and ~17.6x forward P/E on a \$207M cap with only 3 analysts, the discount reflects ~16% single-customer concentration, legacy-messaging drag, lumpy ARR, and competition from far larger CX suites (NICE, Verint, Pega, Salesforce).

SMART DILIGENCE QUESTIONS

- Q1 What is the path for total revenue to re-accelerate above high-single-digits? Once legacy messaging fully runs off by FY2027 and AI Knowledge Hub is the dominant ARR component, what consolidated growth rate does management expect, and what net revenue retention is the AI Knowledge base actually compounding at (gross vs. net of the lumpy EMEA-type churn events)?
- Q2 How durable is the ~16%-of-revenue partner/customer relationship? What are the contract term, renewal timing, and pricing dynamics, and how concentrated is the AI Knowledge Hub ARR within the top 10 logos, i.e., how much of the +26% growth is land-and-expand at a few large accounts (Achmea-style) versus broad new-logo adoption?
- Q3 Where is the competitive moat against bundling? In head-to-head RFPs against NICE, Verint, Pega, Salesforce Service Cloud and Microsoft, what is eGain's win rate and the basis (governance/compliance, integration breadth, accuracy), and how defensible is the 'governed knowledge layer' as hyperscaler-native RAG and enterprise connectors improve?
-
